

ZipZag

Gravity-powered air time

Welcome to ZipZag Rides

Welcome to ZipZag and thank you for showing an interest in our exciting class-leading product.

Our ZipZag rides provide you with a fantastic opportunity to increase visitor numbers to your attraction, whilst also maximising your profitability by utilising otherwise unused space within your existing facility. Our rides can be installed in a wide variety of locations ranging from indoor sites such as trampoline parks and play centres to outdoor attractions, holiday parks and amusement parks.

Our unique patented safety features allow for rapid rider turnaround. These features contribute to class-leading throughput figures you can rely on. This means you should see a return on your investment typically within 1-2 years, although we have seen some rides pay back in less than a year.

We have built an excellent reputation for after-sales care. We are so confident in the quality of our offering that we provide a comprehensive 36-month warranty in conjunction with our Service and Maintenance package.

We are constantly innovating, allowing you to lead and stay ahead of the competition. For example we were the first company in the world to design and install a FREERUN™ Parkour system integrated into our rides.

We are incredibly passionate about ZipZag Rides, the reputation we have built, and above all the difference we can make to the overall profitability of your attraction.

We hope you enjoy reading our brochure and that it gives you a greater appreciation of what we could do for you.

Dave Evans

Your ZipZag journey

1. Design

Once you are happy with our concept and first payment is made we will start finalising your design and begin to plan your ZipZag journey. Your designer will be in touch with the necessary people on your project ensuring a smooth detailed overview. The designer will also conduct a site visit with our head of installation and meet you in person.

2. Manufacture

The design is signed off and fully coordinated with all other suppliers and any other existing site consultants. Your ride is ready for manufacture. All components are manufactured in the United Kingdom.

3. Installation

Our specialised installation team headed by a experienced project manager will start putting your bespoke ride together. This process is fast and one of the most exciting parts. This process will take between 2-3 weeks for an indoor installation and 4-6 weeks for an outdoor installation. The project manager will keep you updated on a daily basis of how your ride is evolving.

4. Handover

The ride is complete. The ZipZag project manager hands the ride over to you and goes through the Operation Manuals. You will need a representative at the handover, who is familiar with harnessed activities who will be responsible for ensuring all staff operating the ride have received adequate ride-familiarisation training.

5. After-sales Care

We will provide maintenance and service to you, inclusive of an inspection of the ride after 12 months at which point we will switch the trolleys with a new set. We will also provide you with a full 36-month warranty if you purchase an annual maintenance visit from us.

Timescales

Indoor
3-4 Months

Outdoor
5-6 Months

Additional time required for shipment outside Europe.

Building requirements

Length of the ride

- Minimum 45m (150')
- No maximum

Throughput

- 70-90 people per hour with 3 staff
- 50-70 people per hour with 2 staff

Clear building height

- For an average 60m (200') ride you need 6.5m (21') to be able to land at just above head height.
- For an average 60m (200') ride you need 5.5m (18') to land people at ground level within a fenced enclosure.
- For an average 60m (200') ride that lands above trampolines you need 9m+ (30'+) clear height.

9m+ (30'+) height to land above trampolines

7.5m to 9m (25' to 30') height to start over trampolines and land above ground

6.5m (21') height to start and land above ground

5.5m (18') height to start and land above ground within a fenced enclosure

About us

Our Knowledge

We have over 30 years of experience as a team in the industry. We have designed and installed amusement rides all over the world and are continuously investing in product development to ensure that our rides are precisely what our clients are after. We have a skilled team of engineers, designers, installers and client liaison personnel who all live for this business.

Our understanding

We understand that every space, location and requirement is different for each and every one of our clients. We understand that you are investing in us to build you a ride that is going to be the next big addition to your facility and our team is here to do everything in our power to ensure that you are getting exactly what you want and what you need.

Results

We have over 3 million riders enjoying our rides every year. The impact of having a ZipZag Ride within your facility results in an opportunity to increase your visitor numbers and to increase profit for your business.

Installation

Our in-house installation team have years of experience in building zip coasters. We offer a strong relationship between your designers and installers, allowing you to visit or video call our office so you can see your ride being built first hand.

Safety

We use specialist harnesses that come in a variety of sizes to ensure every ZipZag rider is safe at all times. We supply an operations manual and ride familiarisation training for your staff to ensure that everyone is clued up in how imperative safety should be. We are also certified with ADIPS, ASTM, DAC, TÜV & Keurmerk.

Key features

Boost Ride Experience

ZipZag continuously innovates to deliver the best experience possible. The exciting elements of the ride include the anticipation, being clipped on to the trolley and the climb up to the launch platform. Our launch trolley is made of aluminium, creating a lighter product which allows children as young as six to be able to tow it up to the launch platform.

Quality

The materials and finish of your attraction is designed to be suitable for indoor and outdoor venues. Your ride will be designed by Chartered Engineers and installed by our professional team. We have a proven record of zip coaster installations, delivering attractions safely and on time. Please contact us to ask for references to support this.

After-sales Service & Maintenance

Your purchase of a ZipZag will include a warranty for your ride for the first year. Purchase of ZipZag's ongoing service and maintenance package extends your warranty. Under this service, trolleys are changed each year. The ride is thoroughly inspected and critical safety features are serviced.

Accessibility

ZipZag creates an accessible ride to a wide range of ages from younger children to older adults. We offer a wide range of harnesses to accommodate different ages, sizes and heights from 0.9m (3'1").

Visibility

The ZipZag ride is visually attractive as well as delivering an exhilarating experience. We design the ride to look aesthetically pleasing to complement and enhance the energy of your space. You can have the track and platforms any colour you like.

Throughput

Typically, with 2 staff, the throughput is 50-70 riders per hour and with 3 staff in attendance is 70-90 riders per hour. This data is based on detailed feedback gathered from our rides.
